

viash is a spec and a tool for defining execution contexts and converting execution instructions to concrete instantiations.

This program comes with ABSOLUTELY NO WARRANTY. This is free software, and you are welcome to redistribute it under certain conditions. For more information, see our license at the link below.

<https://github.com/data-intuitive/viash/blob/master/LICENSE.md>

Usage:

```
viash run config.vsh.yaml -- [arguments for script]
viash build config.vsh.yaml
viash test config.vsh.yaml
viash ns build
viash ns test
```

Check the help of a subcommand for more information, or the API available at:

[https://www.data-intuitive.com/viash\\_docs](https://www.data-intuitive.com/viash_docs)

Arguments:

```
-h, --help    Show help message
-v, --version Show version of this program
```

Subcommands:

```
run
build
test
ns
```
