

Conclusion

Data Intuitive Tuesday - January 26, 2021

This concludes part 1 of the viash workshop and tutorial. Not all aspects of viash have been covered:

- directly running from a remote location `viash run https://...`
- the integrated viash config format where config and script are stored in one file
- advanced troubleshooting and testing scenarios
- using viash for CI/CD purposes

There is also one big topic that *will* be covered in part 2 of this workshop/tutorial: Converting components/namespaces to [NextFlow] modules.
